Content Placement

- The provided content order may differ slightly from the final UI.
- Follow the approved UI layout first and adjust the content placement accordingly.
- The UI design takes priority wherever sections have been rearranged for a better user experience.

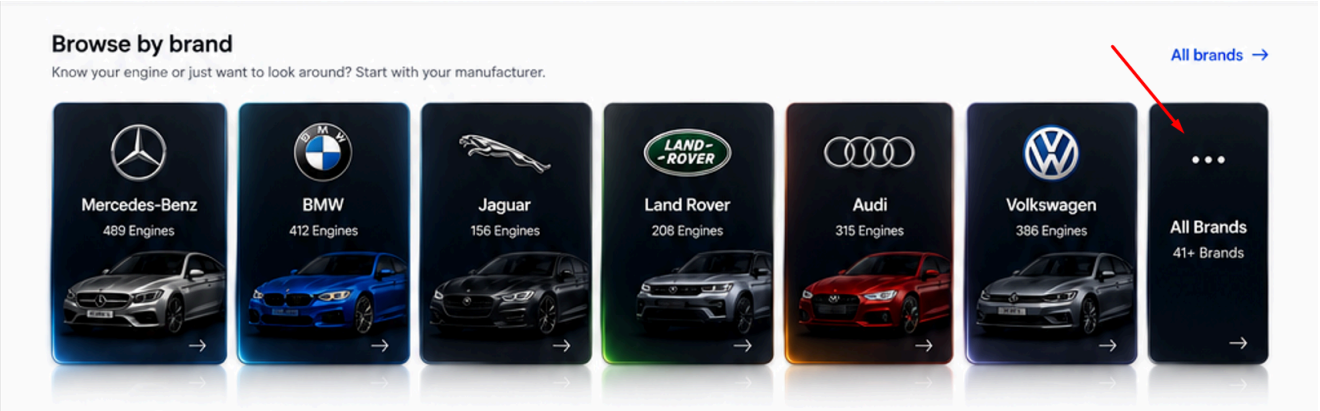

Hero Engine Cards

- Add a subtle floating animation to all engine cards so they gently move and feel alive.
- The animation should be slow, smooth, and premium—avoid any fast or exaggerated movement.
- Each card should be fully clickable and navigate to its respective engine page.
- On desktop, add a slight glow/elevation on hover while keeping the floating animation running.
- Apply the same floating animation and click behavior on mobile, ensuring the motion remains smooth

CTA Button (Find My Engine / Check Fitment)

- Add a premium hover effect to the primary CTA button.
- On hover:
    - Lighten the blue background slightly.
    - Add a soft blue glow.
    - Lift the button by 2–3px with a slightly stronger shadow.
- Use a smooth ease-out transition.

- Keep the interaction subtle and premium

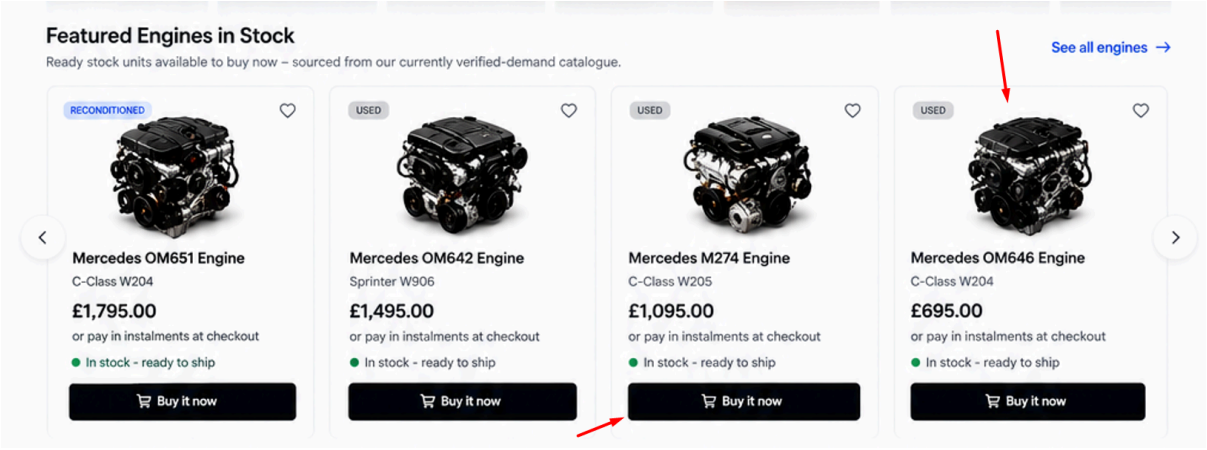

Brand Cards

- Keep the existing premium glow/lighting effect on each brand card.
- Add a subtle hover effect with a slight lift, soft shadow, and enhanced glow to indicate interactivity.
- Keep the animation smooth and minimal.

All Brands Card

- The All Brands card should not navigate to a new page.
- On click, smoothly scroll the user to the "Shop by Brand" section, located two sections below on the same page.
- Use smooth scrolling for a seamless user experience.

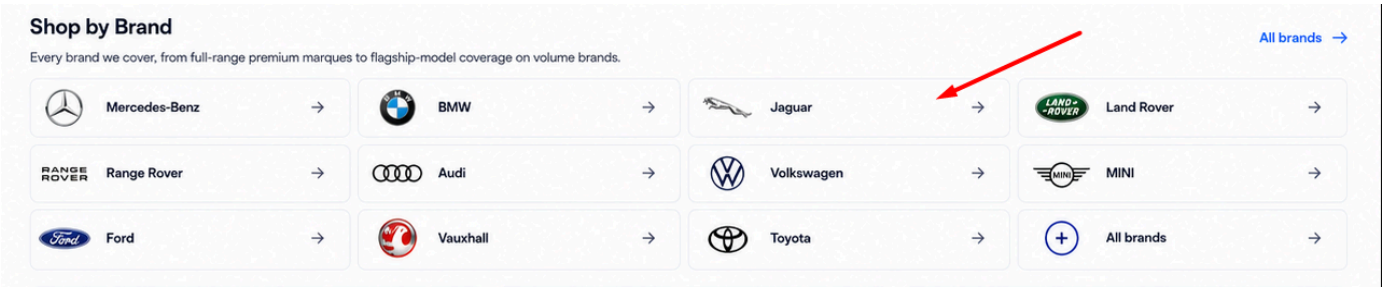

Engine Cards

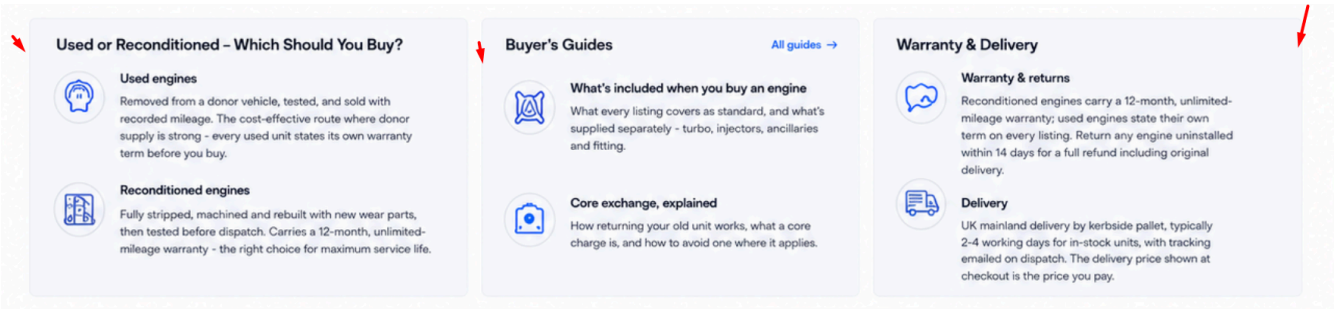

- Add a subtle hover effect to each engine card with a slight scale-up and a soft shadow/elevation.
- Keep the animation smooth

Buy It Now Button

- On hover, change the button to an outlined style.
- Make the background white (the card background color), add a black border, and change the text and icon to black.
- Keep the transition smooth

- Add a **subtle hover animation** to each brand card.
- On hover, slightly scale the card up and add a soft shadow/elevation.

Information Cards

- Add a subtle hover effect to each card.
- On hover, apply a thin glowing border using the site's dark navy/blue theme color.
- Add a very soft outer glow to the border for a premium look.
